

## SUBJECT INDEX

- A**
- AA4.1 monoclonal antibody hematopoietic stem cells and, 96
- Abcess**  
 autosomal dominant polycystic kidney disease and, 26  
 ulcerative colitis and, 108  
 abdominal aortic aneurysm  
 autosomal dominant polycystic kidney disease and, 24
- Abdominal pain**  
 collagenous colitis and, 106  
 lymphocytic colitis and, 110
- abl gene**  
 chronic myelogenous leukemia and, 3, 5
- ABO blood type**  
 intestinal transplantation and, 83
- Absence seizures**  
 mechanisms of, 380
- Acetazolamide**  
 airway ion transport and, 430
- Acetylcholine**  
 airway ion transport and, 425
- N-Acetylglucosamine**  
*Pneumocystis carinii* pneumonia and, 267
- Achalasia**  
 esophageal smooth-muscle region and, 21
- Achondrogenesis II/hypochondrogenesis**  
 molecular basis of, 150, 155-56
- Acidic fibroblast growth factor (aFGF)**  
 diabetes mellitus vascular complications and, 181
- Acidosis**  
 nephrolithiasis and, 237
- Acid phosphatase**  
 gonadotropin-releasing hormone and, 399
- Acquired Fanconi's syndrome**  
 monoclonal proteins and, 75
- Acquired immunodeficiency syndrome (AIDS)**  
 encephalitis  
 endothelial-leukocyte adhesion molecules and, 371  
 growth hormone and, 465  
*Pneumocystis carinii* pneumonia and, 262, 264, 268  
 tumor necrosis factor and, 493, 498
- Acrogeria**  
 Ehlers-Danlos type IV and, 150
- Acromegalic features**  
 growth hormone and, 409
- Actin**  
 thalassemia and, 213-14
- Activin**  
 gonadotropin-releasing hormone and, 396
- Acute infectious colitis**  
 collagenous colitis and, 109
- Acute lymphoblastic leukemia (ALL)**  
 B-cell, 4  
 chromosomal translocations and, 4, 8  
 fusion proteins and, 7  
 prognosis for, 8  
 T-cell, 4
- Acute myelogenous leukemia (AML)**  
 chromosomal translocations and, 8  
 prognosis for, 8  
 subtype of, 6
- Acute phase proteins**  
 tumor necrosis factor and, 496
- Acute promyelocytic leukemia (APL)**  
 t(15;17) and, 6
- Acute renal tubular necrosis**  
 tumor necrosis factor and, 494
- Acute respiratory distress syndrome (ARDS)**  
 lung transplantation and, 145
- Acyclovir**  
 intestinal transplantation and, 83, 88
- Adenomatous foci**  
 hepadnavirus-associated liver cancer and, 307, 318
- Adenosine diphosphate (ADP)**  
 hirudin and, 170
- Adenosine monophosphate (AMP)**  
 airway ion transport and, 430
- Adenosine scanning**  
 myocardial infarction survivors and, 331
- Adenosine triphosphate (ATP)**  
 airway ion transport and, 425, 427-28
- Adenovirus**  
 intestinal transplantation and, 88
- Adenylate cyclase**  
 thyroid neoplasms and, 48
- Adenyl cyclase**  
 airway ion transport and, 427
- Adhesion molecules**  
 disease and, 361-73
- Adhesions**  
 intestinal transplantation and, 84  
 lung transplantation and, 144
- Adhesive proteins**  
*Pneumocystis carinii* pneumonia and, 263
- Adipocytes**  
 tumor necrosis factor and, 493, 496
- Adolescents**  
 growth hormone and, 413  
 heart transplantation and, 141  
 lymphocytic colitis and, 110  
 Stickler syndrome and, 156
- Adoption**  
 psychosis and, 224
- ADPKD series genes**  
 autosomal dominant polycystic kidney disease and, 24-25, 27
- Adrenal glands**  
 diabetes mellitus during pregnancy and, 255  
 gonadotropin-releasing hormone and, 400  
 male sex determination and, 519  
 myocarditis and, 487  
 nephrotic syndrome and, 206  
 prostate cancer and, 356
- Adrenocorticotrophic hormone (ACTH)**  
 tumor necrosis factor and, 495
- Adriamycin**  
 heart transplantation and, 140  
 multiple myeloma and, 73

- Adult respiratory distress syndrome (ARDS)  
 endothelial-leukocyte adhesion molecules and, 369  
 tumor necrosis factor and, 494, 498
- Advanced glycosylation end products (AGE)  
 diabetes mellitus vascular complications and, 185-86
- Affective disorders  
 psychosis and, 219-23, 230
- Aflatoxin B1  
 hepatitis-associated  
 liver cancer and, 299, 315  
 thyroid neoplasms and, 49
- Ag 332  
 malaria and, 290
- Agarose gel electrophoresis  
 chromosomal translocations and, 3
- Age  
 Alzheimer's disease and, 436, 439-40  
 autosomal dominant polycystic kidney disease and, 24-25, 27  
 collagenous colitis and, 105-6, 114  
 epilepsy and, 379-80  
 growth hormone and, 408-9, 418  
 hepatitis-associated  
 liver cancer and, 298  
 intestinal transplantation and, 90  
 lymphocytic colitis and, 105, 110, 114  
 myocardial infarction survivors and, 325, 327, 334  
 myocarditis and, 485  
 prostate cancer and, 355-56, 358  
 thyroid nodules and, 45  
 transcription factors and, 3
- Air pollution  
 airway ion transport and, 430
- Airway ion transport  
 abnormalities of  
 developmental diseases, 429-30  
 environmental diseases, 430  
 genetic diseases, 426-29  
 introduction to, 421-22  
 normal ion transport physiology  
 bronchial surface epithelial ion transport, 423-25  
 overview, 422-23  
 submucosal gland function, 425-26
- Akinesia  
 electrocardiographic  
 acute myocardial infarction and, 39
- Alanine  
 Alzheimer's disease and, 438  
 diabetes mellitus during pregnancy and, 248  
 gonadotropin-releasing hormone and, 392  
 growth hormone and, 466
- Albumin  
 diabetes mellitus vascular complications and, 185  
 intestinal transplantation and, 89  
 multiple myeloma and, 72  
 nephrotic syndrome and, 201-7
- Alcoholic liver disease  
 hepatitis-associated  
 liver cancer and, 299, 317
- Aldose reductase  
 diabetes mellitus vascular complications and, 182-84
- Aldosterone  
 autosomal dominant polycystic kidney disease and, 25
- Alkaline phosphatase  
 gonadotropin-releasing hormone and, 399
- Allergic reactions  
 airway ion transport and, 430  
 endothelial-leukocyte adhesion molecules and, 369-70, 372  
 heparin and, 167  
*Pneumocystis carinii* pneumonia and, 268
- Allografts  
 hematopoietic stem cells and, 98  
 rejection of  
 myocarditis and, 488  
 tumor necrosis factor and, 498
- Allopurinol  
 multiple myeloma and, 73
- All-trans-retinoic acid  
 cell differentiation and, 6
- Alopecia areata  
 endothelial-leukocyte adhesion molecules and, 372  
 heparin and, 167
- Alpha-hydroxy-beta-ketoadipate  
 nephrolithiasis and, 239
- Alport syndrome  
 molecular basis of, 151, 158
- Alveoli  
*Pneumocystis carinii* pneumonia and, 263-267  
 Alzheimer's disease  
 animal models and, 439-43  
 biology of, 436-39  
 brain asymmetry and, 225  
 introduction to, 435-36
- Amenorrhea  
 gonadotropin-releasing hormone and, 397, 400
- Amiloride  
 airway ion transport and, 424-30
- Amino acids  
 Alzheimer's disease and, 437-38  
 diabetes mellitus during pregnancy and, 248, 252, 254  
 gonadotropin-releasing hormone and, 392, 402  
 hepatitis-associated  
 liver cancer and, 311  
 malaria and, 290  
 male sex determination and, 508-9  
 multiple myeloma and, 72  
 nephrotic syndrome and, 203-4  
 parathyroid hormone-related protein and, 195  
 protein catabolism and, 460-63, 465, 469-71, 473-74
- Aminoaciduria  
 acquired Fanconi's syndrome and, 75
- Aminoglycosides  
 autosomal dominant polycystic kidney disease and, 26
- Aminoguanidine  
 diabetes mellitus vascular complications and, 186
- $\alpha$ -Amino-3-hydroxy-5-methyl-4-isoxazole propionic acid (AMPA)  
 epilepsy and, 387
- Amiodarone  
 ventricular arrhythmias after myocardial infarction and, 119, 124-26, 130-31, 133-35
- Amisulpride  
 long-term treatment and, 449-50, 452-53, 455
- Ammonia  
 protein catabolism and, 471-72, 474
- Ammon's horn sclerosis  
 temporal lobe epilepsy and, 381-86
- Amnesic syndrome  
 electroconvulsive therapy and, 276
- Amphetamine  
 psychosis and, 226
- Amesiosis fugax  
 carotid arteriosclerosis and, 54
- Amygdala  
 Alzheimer's disease and,

- 436, 441  
epilepsy and, 381  
psychosis and, 227  
Amygdalohippocampal formation  
psychosis and, 226  
Amyloid  
Alzheimer's disease and, 437-43  
collagenous colitis and, 107, 109  
immunotactoid glomerulonephropathy and, 76  
primary systemic amyloidosis and, 74  
light-chain deposition disease and, 75  
monoclonal proteins and, 71  
multiple myeloma and, 73  
Waldenström's macroglobulinemia and, 75  
Amyotrophic lateral sclerosis  
oropharyngeal dysphagia and, 17  
Anabolic steroids  
growth hormone and, 414  
protein catabolism and, 464-71  
Anabolism  
fetal  
diabetes mellitus during pregnancy and, 247  
Analbuminemia  
nephrotic syndrome and, 202, 204  
Analgesics  
autosomal dominant polycystic kidney disease and, 26  
Anaplastic thyroid carcinoma  
genetics of, 46, 49-50  
Anastomosis  
carotid arteriosclerosis and, 65-66  
intestinal transplantation and, 85, 88  
lung transplantation and, 145  
Anatomical radical prostatectomy  
prostate cancer and, 351, 354-56  
Ancrod  
lupus nephritis and, 534-35  
Androgens  
deprivation of  
for prostate cancer, 356-357  
gonadotropin-releasing hormone and, 399-400  
hepatnavirus-associated liver cancer and, 299  
male sex determination and, 507, 509, 516-18, 520  
nephrotic syndrome and, 206  
Anemia  
nephrotic syndrome and, 201, 206  
thalassemia and, 212  
Anencephaly  
diabetes mellitus during pregnancy and, 251  
Anesthesia  
electroconvulsive therapy and, 276-77, 279  
protein catabolism and, 476  
Aneurysms  
autosomal dominant polycystic kidney disease and, 23-24, 28  
electroconvulsive therapy and, 276  
intracranial, 67  
Angina pectoris  
acute myocardial infarction and, 34-35  
esophageal smooth-muscle region disorders and, 21  
hirudin and, 165, 171-72, 174  
partial occlusion and, 32  
postinfarction  
myocardial infarction survivors and, 325-27, 329-30, 334  
Angiography  
carotid arteriosclerosis and, 53-54, 61  
intestinal transplantation and, 82  
myocardial infarction survivors and, 326, 334-35  
Angioplasty  
acute myocardial infarction and, 33  
hirudin and, 165, 168, 170-71, 173  
Angiotensin  
autosomal dominant polycystic kidney disease and, 25  
Angiotensin-converting enzyme (ACE) inhibitors  
autosomal dominant polycystic kidney disease and, 25  
congestive heart failure and, 341-42, 345-47  
myocarditis and, 486  
nephrotic syndrome and, 205  
Anion exchanger  
thalassemia and, 212  
Ankyrin  
thalassemia and, 214-15  
Annuloaortic ectasia  
autosomal dominant polycystic kidney disease and, 24  
Anorexia  
tumor necrosis factor and, 494-96  
Anoxia  
diabetes mellitus vascular complications and, 181  
electroconvulsive therapy and, 277  
Anterior chest deformities  
Marfan syndrome and, 150  
Anterior thalamic limbic circuit  
Alzheimer's disease and, 436  
Anterograde dysfunction  
electroconvulsive therapy and, 276  
Anthropometry principle  
psychosis and, 223  
Antibiotics  
autosomal dominant polycystic kidney disease and, 26  
cystic fibrosis and, 144  
intestinal transplantation and, 88  
*Pneumocystis carinii* pneumonia and, 262  
Antibodies  
collagenous colitis and, 113, 115  
endothelial-leukocyte adhesion molecules and, 368-73  
growth hormone and, 409  
lupus nephritis and, 529-30, 533  
lymphocytic colitis and, 113, 115  
malaria and, 283, 285-86, 292  
male sex determination and, 513, 515  
myocarditis and, 488  
monoclonal  
acute myocardial infarction and, 32, 37, 39-40  
hematopoietic stem cells and, 95-96  
Marfan syndrome and, 151  
multiple myeloma and, 72  
*Pneumocystis carinii* pneumonia and, 262, 266  
thalassemia and, 216  
parathyroid hormone-related protein, 196  
polyclonal  
Alzheimer's disease and, 440-41  
tumor necrosis factor and, 493-96, 499  
Anticoagulants  
myocarditis and, 486

- Antide  
gonadotropin-releasing hormone and, 402
- Antidepressants  
electroconvulsive therapy and, 280  
long-term treatment and dosage, 454-55  
introduction to, 447-48  
overview, 448-51  
prophylactic efficacy, 451-54  
serotonin reuptake inhibitors, 449-51, 454-55  
tricyclic antidepressants, 449-50, 453-54
- Antigens  
hematopoietic stem cells and, 95-98  
hepadnavirus-associated liver cancer and, 300, 305-8  
lymphocytic colitis and, 111  
lymphoid malignancies and, 1-2, 4, 6-7  
malaria and, 288-91  
male sex determination and, 508  
myocarditis and, 482, 484  
*Pneumocystis carinii* pneumonia and, 266-67  
tumor necrosis factor and, 493
- Antilymphocyte globulin (ALG)  
intestinal transplantation and, 87
- Antioxidants  
*Pneumocystis carinii* pneumonia and, 266  
protein catabolism and, 460, 462-73, 476
- $\alpha_2$ -Antiplasmin  
acute myocardial infarction and, 32
- Antithrombin III  
hirudin and, 165-69, 172-74  
intestinal transplantation and, 82  
nephrotic syndrome and, 205
- $\alpha_1$ -Antitrypsin  
deficiency  
hepadnavirus-associated liver cancer and, 299
- Anxiety  
acute myocardial infarction and, 34
- Aorta  
autosomal dominant polycystic kidney disease and, 28  
congenital contractural arachnodactyly and, 153  
diabetes mellitus vascular complications and, 184  
esophagus and, 14  
Marfan syndrome and, 150-51
- APC gene  
thyroid neoplasms and, 50
- Aphasia  
carotid arteriosclerosis and, 54
- Aplastic diseases  
hematopoietic stem cells and, 99
- APLP series proteins  
Alzheimer's disease and, 437-38
- Apolipoprotein E type 4 (Apo-E4)  
Alzheimer's disease and, 436, 439, 442
- Apolipoproteins  
nephrotic syndrome and, 202, 204
- Apoptosis  
thalassemia and, 215-17  
thyroid neoplasms and, 49  
transcription factors and, 3
- APP protein  
Alzheimer's disease and, 435-42
- AP series transcription factors  
hepadnavirus-associated liver cancer and, 311  
male sex determination and, 515
- Arachidonic acid  
diabetes mellitus during pregnancy and, 249  
*Pneumocystis carinii* pneumonia and, 266
- Arachnodactyly  
congenital contractural arachnodactyly and, 153
- Arachnoid cysts  
autosomal dominant polycystic kidney disease and, 24, 28
- Arcuate nucleus  
gonadotropin-releasing hormone and, 394
- Aredia  
multiple myeloma and, 73
- Arginine  
gonadotropin-releasing hormone and, 392  
growth hormone and, 411  
hepadnavirus-associated liver cancer and, 314  
hirudin and, 170  
nephrotic syndrome and, 203  
*Pneumocystis carinii* pneumonia and, 266  
protein catabolism and, 460, 462, 474, 476
- Arms  
acute myocardial infarction and, 34  
carotid arteriosclerosis and, 54
- Aromatase  
male sex determination and, 509-13
- Arterial occlusive disease  
intestinal transplantation and, 87
- Arteries  
Ehlers-Danlos syndrome and, 150, 153-54  
lung transplantation and, 143, 145  
myocardial infarction survivors and, 325-26, 332
- Arteriography  
carotid arteriosclerosis and, 60, 64-65
- Arterioles  
autosomal dominant polycystic kidney disease and, 25, 27
- Arteriosclerosis  
carotid, 53-67
- Arthralgias  
growth hormone and, 418, 468
- Arthritis  
endothelial-leukocyte adhesion molecules and, 361, 366, 371  
lupus nephritis and, 529  
lymphocytic colitis and, 110  
spondyloepiphyseal dysplasia congenita and, 150  
Stickler syndrome and, 150, 156  
tumor necrosis factor and, 498-99
- Asparagine  
Alzheimer's disease and, 438
- Aspartate  
nephrotic syndrome and, 203
- Aspiration  
airways and, 13-14  
oropharyngeal dysphagia and, 16-17
- Aspirin  
carotid arteriosclerosis and, 53, 55-56, 58  
hirudin and, 166-67, 171-72
- Assisted fertilization  
gonadotropin-releasing hormone and, 400
- Asthma  
airway ion transport and, 426, 428, 430  
endothelial-leukocyte adhesion molecules and, 369-70

- gastric reflux and, 14
- Astrocytes**
- Alzheimer's disease and, 440-41
- tumor necrosis factor and, 493
- Ataxia**
- growth hormone and, 408
- Atherogenesis**
- nephrotic syndrome and, 204-6
- Atheroma**
- accretion
- acute myocardial infarction and, 32
- Atherosclerosis**
- diabetes mellitus vascular complications and, 182
- endothelial-leukocyte adhesion molecules and, 361, 367
- heart transplantation and, 141-42
- hirudin and, 170-71
- myocardial infarction survivors and, 326, 335
- nephrotic syndrome and, 205-6
- ventricular arrhythmias after myocardial infarction and, 120, 131, 135
- Atopic dermatitis**
- endothelial-leukocyte adhesion molecules and, 372
- Atresia**
- intestinal
- intestinal transplantation and, 81
- Atrial fibrillation**
- nonsustained ventricular tachycardia and, 134
- Atrial natriuretic factor (ANF)**
- nephrotic syndrome and, 201, 208
- Atrial-ventricular conduction abnormalities**
- myocarditis and, 485
- Aura**
- epilepsy and, 380
- Autoantibodies**
- collagenous colitis and, 113, 115
- lymphocytic colitis and, 113, 115
- Autoantigens**
- myocarditis and, 482
- Autocrine factors**
- hypercalcemia of malignancy and, 192, 196
- Autoimmune diseases**
- collagenous colitis and, 106, 115
- lymphocytic colitis and, 110, 115
- Autoimmune encephalomyelitis**
- endothelial-leukocyte adhesion molecules and, 371
- Autoimmune hepatitis**
- hepatnavirus-associated liver cancer and, 317
- Autoimmune thyroiditis**
- lymphocytic colitis and, 110
- Autonomic nervous system (ANS)**
- diabetes mellitus and, 183, 255
- electroconvulsive therapy and, 276-77
- myocardial infarction survivors and, 327, 333
- Autosomal dominant inheritance**
- connective tissue disorders and, 150-58
- thyroid neoplasms and, 50
- Autosomal dominant polycystic kidney disease (ADPKD)**
- diagnosis of, 24-25
- epidemiology and genetics, 23-24
- extrarenal manifestations, 27-28
- introduction, 23
- manifestations of, 24
- natural history, 25-28
- renal manifestations, 25-27
- Autosomal recessive inheritance**
- connective tissue disorders and, 150-51, 154, 156-58
- male sexual differentiation disorders and, 518-19
- Avian myeloblastosis virus *c-myc* oncogene and, 5**
- A-V block**
- myocardial infarction survivors and, 327
- A-V transposition**
- diabetes mellitus during pregnancy and, 249
- Azathioprine**
- intestinal transplantation and, 79
- lung transplantation and, 144
- lupus nephritis and, 525, 534-35
- myocarditis and, 487-88
- Azotemia**
- protein catabolism and, 462-63
- B**
- Back pain**
- acute myocardial infarction and, 34
- autosomal dominant polycystic kidney disease and, 25
- Backscatter**
- acute myocardial infarction and, 39-40
- Bacteria**
- autosomal dominant polycystic kidney disease and, 26
- collagenous colitis and, 106
- intestinal transplantation and, 88
- myocarditis and, 485
- nephrotic syndrome and, 206
- tumor necrosis factor and, 493, 496, 498-99
- Balloon angioplasty**
- acute myocardial infarction and, 34, 39
- Band 3**
- modified
- malaria and, 290
- thalassemia and, 212-13, 216
- Band 4.1**
- thalassemia and, 213-16
- Barium enema**
- lymphocytic colitis and, 109
- Barrier function**
- protein catabolism and, 459
- Basal forebrain cholinergic system**
- Alzheimer's disease and, 436
- Basal tumors**
- deliberate obliteration of major cerebral arteries and, 67
- Basement membrane**
- collagenous colitis and, 106-8
- diabetes mellitus vascular complications and, 180-81, 184-86
- Pneumocystis carinii* pneumonia and, 264
- progressive systemic sclerosis and, 109
- Waldenström's macroglobulinemia and, 75
- Basic fibroblast growth factor (bFGF)**
- diabetes mellitus vascular complications and, 181
- Basket cells**
- epilepsy and, 382-84, 386
- Basophils**
- Pneumocystis carinii* pneumonia and, 268
- B-cell leukemias**
- chromosomal translocations and, 4
- transcription factor fusion

- proteins and, 7
- B cells  
hematologic malignancies and, 4  
*Pneumocystis carinii* pneumonia and, 268
- bcl-3* protooncogene  
hematologic malignancies and, 4
- BCR-ABL fusion protein  
chronic myelogenous leukemia and, 3, 5, 7
- bcr* gene  
chronic myelogenous leukemia and, 3
- Bed rest  
autosomal dominant polycystic kidney disease and, 26
- Behavioral deficits  
Alzheimer's disease and, 436, 443
- Bence Jones proteinuria  
acquired Fanconi's syndrome and, 75  
multiple myeloma and, 72-73
- Benign prostatic hyperplasia  
prostate cancer and, 353
- Benzodiazepines  
electroconvulsive therapy and, 277
- Beta agonists  
airway ion transport and, 426-27
- Beta blockers  
diabetes mellitus during pregnancy and, 255  
myocardial infarction survivors and, 333  
ventricular arrhythmias after myocardial infarction and, 119, 123-26, 131-33
- Beta-carotene  
protein catabolism and, 464, 476
- Bicuculline  
epilepsy and, 385
- Bifurcation  
carotid  
carotid arteriosclerosis and, 62
- Bilateral carotid artery occlusion  
carotid arteriosclerosis and, 54
- Bile salts  
collagenous colitis and, 113  
lymphocytic colitis and, 113
- Bilirubin  
protein catabolism and, 463
- Biological response modifiers
